Industrial applicability (IA)

- 1. The amendments to the claims, submitted with the letter dated 29.7.2004, are admissible (PCT Article 34(2)(b)) (claims 1 and 2 as originally filed).
- 2. Reference is made to the following documents:

Claims

Claims

D1: EP-A-0 029 153 (NESTLE SA) 27 May 1981 (1981-05-27)

D2: US-A-2 203 643 (ALBERT MUSHER) 4 June 1940 (1940-06-04)

D4: WO-A-98 13133 (DUFFETT WILLIAM; AGGLOMERATION TECHNOLOGY LTD (GB)) 2 April 1998 (1998-04-02) & EP-A-0 934 110 11 August 1999 (1999-08-11) cited in the application.

3. Claim 1 is not considered to be a "use"-type claim for the following reason:

A claim directed to a substance or to a composition for a particularly use should be understood to indicate a substance or a composition suitable for a particular use. If the known product was in a form such that it indeed became suitable for the use indicated, even if it had not been intended for such a use, the claim would lose its

character of novelty (PCT Guidelines chapter 5.12).

Indeed, cocoa butter (e.g. D4) is in a form such that it is indeed suitable for use as a gelatine substitution product.

Therefore, the subject matter of claims 1, 2, 10 and 11 is not novel (PCT Article 33(2)).

4. Document D1 relates to a method for making a food base that is instantaneously dispersible in water from an amylaceous material and fat (palm fat). Said food base (a roux) is used to bind dry soups and sauces in the same way as gelatine. This food base is a finished or semi-finished product that can be incorporated in mixtures for soups or sauces to bind said soups and sauces during the preparation thereof via the addition of boiling water to the dry mixtures (without forming lumps) (claims 1 and 2, examples 1-4, page 1, line 4 to page 2, line 31, page 5, lines 21-30, page 7, lines 3-29). It is obvious for a person skilled in the art to use cocoa butter with a corresponding effect. Consequently, the subject matter of claim 7 does not involve an inventive step in the light of D1 (PCT Article 33(3)).

Document D2 relates to a food thickener containing a polysaccharide (starch) and a fat. First, the polysaccharide is added (with optional heating) followed by the fat. The product is used for preparing sauces, food preparations and pastries (claims 1-3 and 8, examples 1-13, page 1, column 1, lines 11-35 and 47, to column 2, lines 11 and 38-55, page 2, column 1, line 1 to column 2, line 11, page 5, column 1, lines 13-56). It is obvious for a person skilled in the art to use cocoa butter with a corresponding effect. Consequently, the subject matter of claims 6-9 does not involve an inventive step in the light

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/FR 03/02239

of D2 (PCT Article 33(3)).

Dependent claims 3 to 5 do not contain any feature which, in combination with those of any of the claims to which they refer, defines subject matter that meets the PCT requirements with respect to inventive step for the following reasons:

The features of dependent claim 3 have already been used for the same purpose in D1. It is obvious for a person skilled in the art to apply said features with a corresponding effect. Consequently, the subject matter of claim 3 does not involve an inventive step.

Claims 4 and 5 define a slight alteration to the invention described in claim 1; said alteration forms part of standard practice for a person skilled in the art and the resulting advantages are easily foreseeable. Consequently, the subject matter of claims 4 and 5 does not involve an inventive step either.
